QUALITY WHEN YOU NEED IT MOST
The Bespoke Steel Fabrication Experts
Specialists in Animal Containment
and Transfer Systems

ABOUT US

Established in 1984, CLM Services Ltd has grown to be one of the UK's leading engineering businesses, specialising in the design, fabrication and installation of bespoke steel projects for zoos and wildlife parks across the UK.

CLM works as both a specialist supplier to main contractors and also directly for zoos and wildlife parks to deliver **fully integrated animal circulation systems** and **bespoke animal containment equipment**.

Our bespoke products are designed to help keepers to care for animals whilst guaranteeing safety. From developing systems which allow keepers to move tigers safely around their enclosure, to building robust screens that let keepers perform health checks on elephants, our products are safe, strong and made to last!

WHAT WE DO

DESIGN

We produce creative and bespoke designs, developed using the latest 3D design technology. We will consider the most suitable materials, any site restrictions and other project interfaces to produce a cost-effective solution.

FABRICATION

Our team fabricate complex steel structures from detailed technical drawings. During the fabrication process, the product is subject to rigorous quality testing procedures and will only be signed off for installation once all safety and quality checks are met.

INSTALLATION

Our installation team are experienced at working in zoos and wildlife parks, liaising with keepers, estates teams or main contractors to accommodate even the most challenging site logistics. CLM site staff are CSCS, CPCS, IPAF and PASMA accredited. Our flexible and collaborative approach makes us a valuable part of the project team.

MAINTENANCE

We can make regular visits to periodically check on the working function of doors and transfer slides, and to address any requirement for repair or improvement.

SAFE, STRONG AND MADE TO LAST!

OUR BESPOKE PRODUCTS

Designed to allow keepers to safely and effectively care for animals, our products include:

- **Off Show Enclosures**
- **Keeper Operated Doors**
- **Animal Transfer Tunnels**
- **Animal Transfer Slides**
- **Viewing Screens and Windows**
- **Viewing Platforms**
- **Bespoke Steel Structures**
- **Access Ramps and Edge Protection**
- **Roof Bridges**

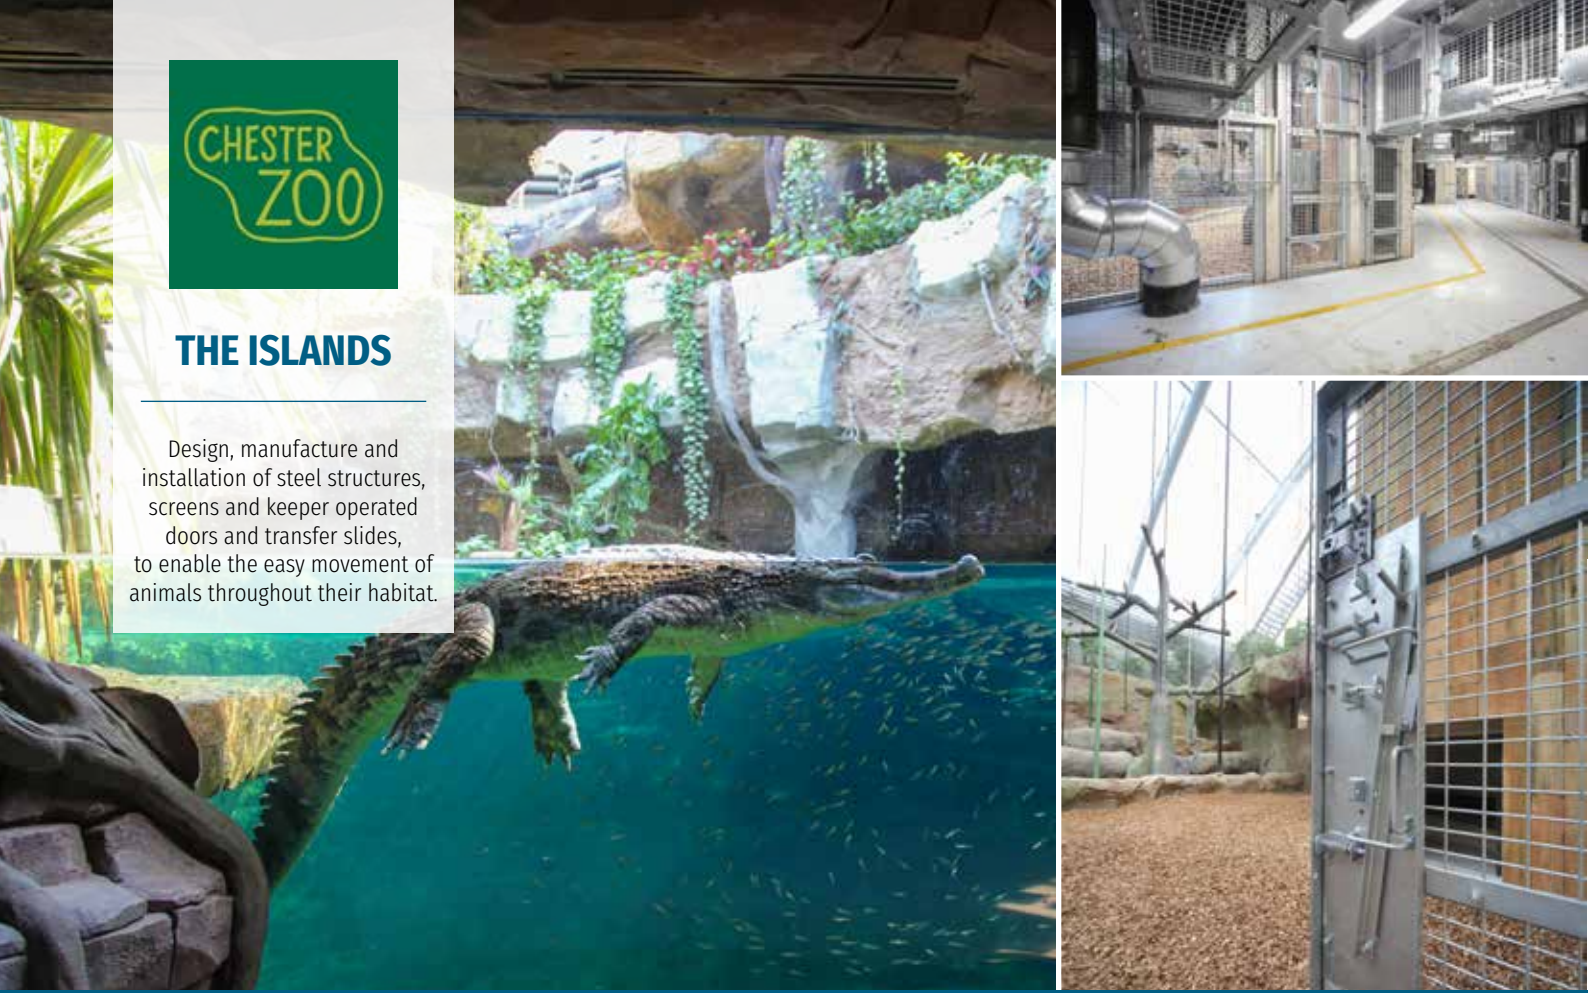
Our unique doors and slides are operated using innovative pullies, wire ropes and specially designed safety ratchets, which allow doors to be quickly and safely closed as the animals move.

HEALTH AND SAFETY

From selecting the most robust and high-quality materials, to developing the safest method of installation, we design safety into every stage of our projects.

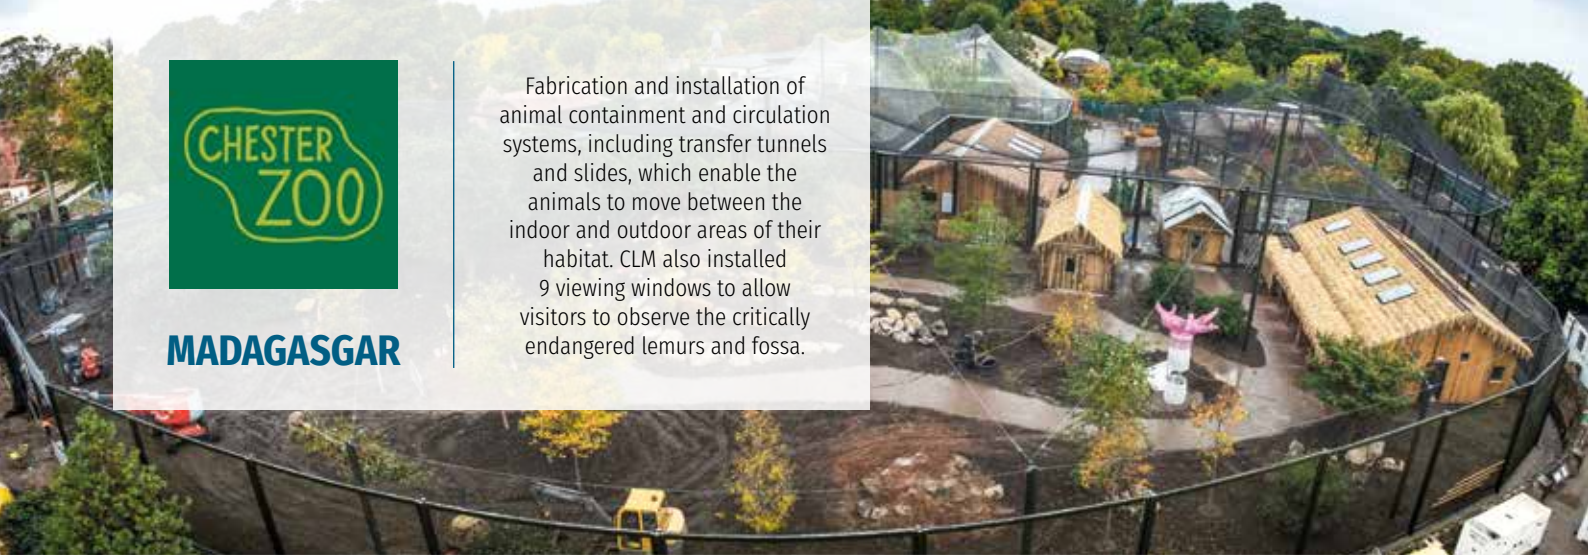
Our company health and safety culture encourages staff to be vigilant and innovative in their approach to safety and to work collaboratively with the entire project team. This is critical when managing sensitive locations close to animals or the public.

Take confidence from our accreditations...



THE ISLANDS

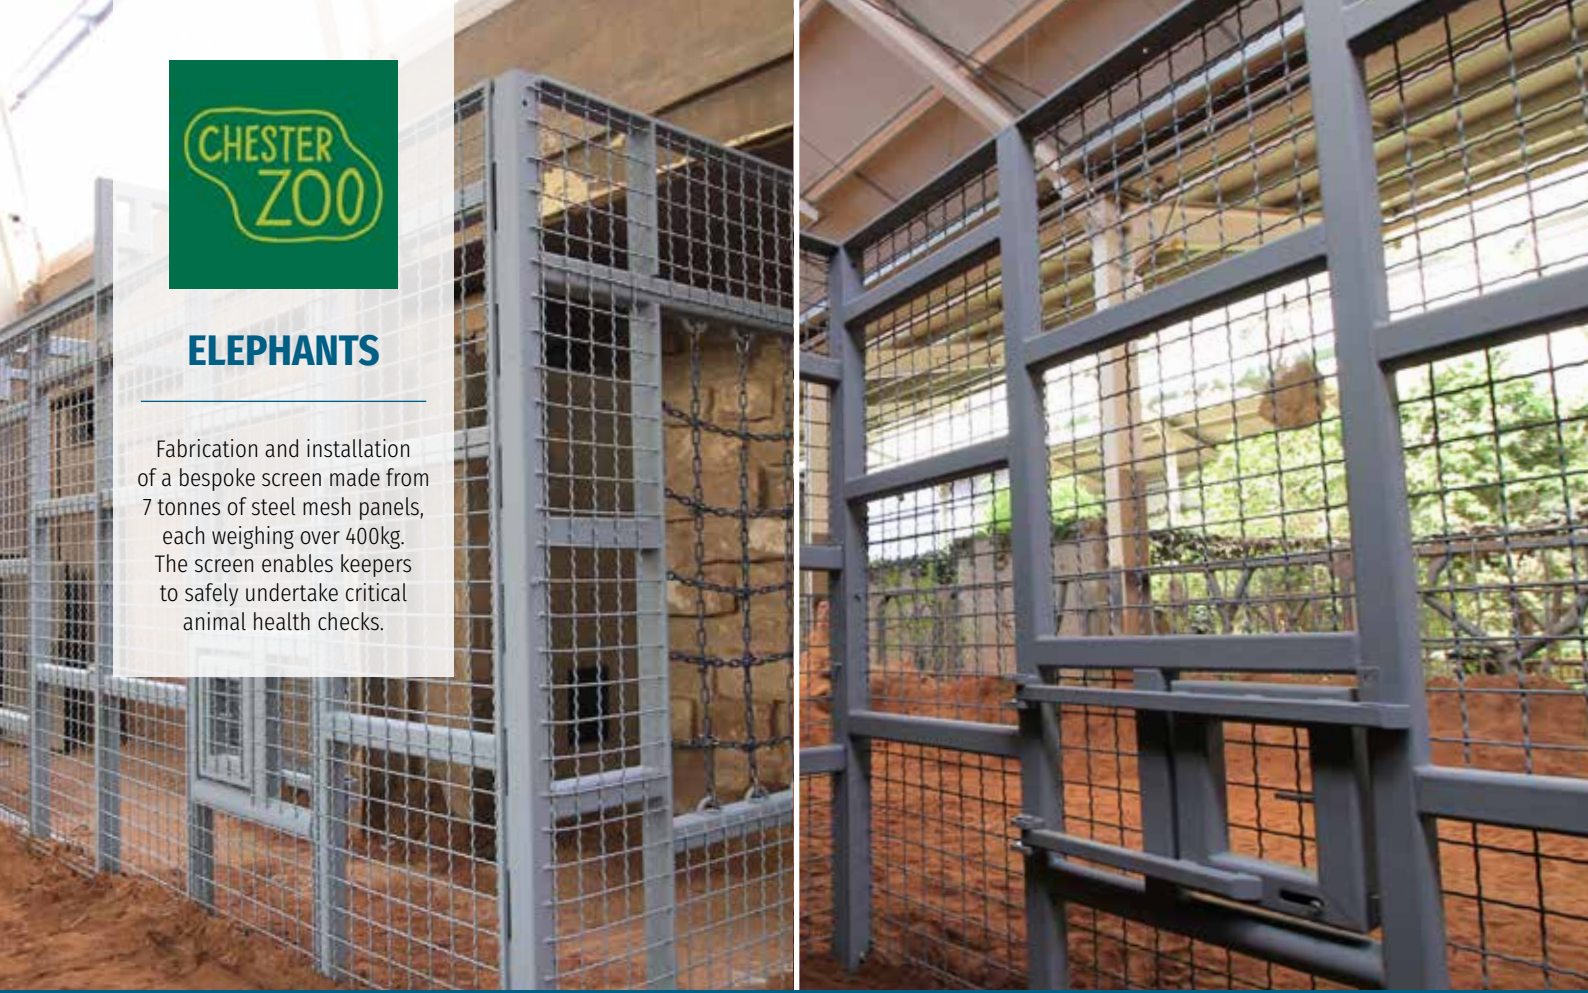
Design, manufacture and installation of steel structures, screens and keeper operated doors and transfer slides, to enable the easy movement of animals throughout their habitat.



CHESTER ZOO

MADAGASGAR

Fabrication and installation of animal containment and circulation systems, including transfer tunnels and slides, which enable the animals to move between the indoor and outdoor areas of their habitat. CLM also installed 9 viewing windows to allow visitors to observe the critically endangered lemurs and fossa.



ELEPHANTS

Fabrication and installation of a bespoke screen made from 7 tonnes of steel mesh panels, each weighing over 400kg. The screen enables keepers to safely undertake critical animal health checks.

Twycross Zoo
EXPLORING THEIR WORLD

CHIMPANZEE EDEN

Design and installation of a bespoke system of 23 slides and 9 doors, operated using pullies, wire ropes and specially designed safety ratchets. CLM also installed a range of viewing windows in the exhibit to allow visitors to closely observe the animals.

KNOWSLEY SAFARI

AMUR TIGERS

Construction of five 'off-show' tiger dens and the installation of glass viewing screens. The off-show facility includes 23 keeper operated slides between the five dens, enabling keepers to safely move the tigers around their habitat with ease.

CHESTER ZOO

SUN BEARS AND TAPIRS

Specialist steel work package for all off show areas, including 14 keeper operated slides, 8 keeper operated doors and 10 glazed viewing screens.

Twycross Zoo
EXPLORING THEIR WORLD

TIGERS

Specialist package to fabricate and install external off-show yard and internal screens to form various dens and keeper corridors. To move the tigers safely around the habitat, CLM installed 4 bespoke animal transfer tunnels, 19 slides and 8 keeper operated doors.

LIONS

Fabrication and installation of external off-show yard and various internal screens to form dens and keeper corridors. To move the lions safely around their habitat, CLM installed 15 slides and 15 keeper operated doors.

FAMILY BUSINESS, FAMILY ETHICS!

Our customers return to us time and time again. Excellent customer service, from initial enquiry through to project handover, is something we pride ourselves on.

For a better understanding of how our innovative products and solutions can enhance your project, get in touch!

INSTALLATION OF CHIMPANZEE SHELTER, TWYCROSS ZOO

"It was a pleasure to have the CLM team here, they were professional, quick and the quality of work was good, as we have now come to expect from you. We appreciate you completing the project before the summer holidays, as this will give our visitors a much better chance to see the chimps outside and allow our chimps to enjoy the summer weather."

Matyas Liptovszky, Head of Life Sciences, Twycross Zoo

OTHER SECTOR EXPERIENCE

CLM also works across a number of industries including health, education, retail and commercial to supply and fit...

- **Structural Steel**
- **Staircases**
- **Balconies**
- **Stainless & Glass Balustrades**
- **Handrails**
- **Access Ramps**
